QUARTERLY NEWSLETTER

WELCOME

Hello all. Spring is finally upon us, with a few sunny days starting to appear. The Edifice team have been hard at work. Read on to find out what we've been up to.

In this Newsletter...

- NZ Bridge Awards 2022
- Project Updates from the last quarter

Enjoy!

The Edifice Team

OUR TEAM

In the last few months, we have been crazy busy with current and upcoming projects. The team continue to produce high quality pedestrian structures. Below is a recent photo of our awesome team, on a rare occasion when everyone was back at the yard.

L-R: Nathan Gilligan, Justin (Dutchy) Benner, Kayla Conroy, Gizaria Knowles, Lena Chambers, Chad Kiernander, Andrew Hamilton, Roy Hamilton & Brett Hamilton

NAENAE GLULAM BRIDGE

Earlier in the year our team completed a 6 metre glulam bridge in Naenae. The team prefabricated the structure at our plant based in Levin. It arrived at site ready to go and the installation ran very smoothly.

If you are wanting to check it out, access is off Waddington Road, Lower Hutt across the Waiwhetu Stream to Naenae Park, Pay a visit next time you're in the area.

EDWIN BURN, ROUGH CREEK & SOUTH COAST BRIDGES

This project was a request for tender process as 3 separate tender packages:

- Edwin Burn
- Rough Creek
- South Coast

Edifice Structures are pleased to be the preferred supplier for all 3 tenders, with 5 structures in total. Another big tender to add to the books. We're aiming to start pre fabrication this year. We'll keep you updated on our social media pages, so head to LinkedIn, Instagram or Facebook to stay up to date with the progress.

HULLS CREEK

This glulam bridge project is almost complete. This 15m glulam bridge was prefabricated by our team at our yard, here in Levin and was delivered this week. Our team were ready onsite when it arrived to complete the installation. Another successful project by the team. This structure is located in Hulls Creek, Upper Hutt.

THE WATER OF LEITH

This awesome structure was recognised at the New Zealand Bridge Awards recently. The Water Of Leith cable-stayed footbridge designed by DC Structures and constructed by Edifice Structures won the highly prestigious "Bridge Design Excellence" Award. We're proud to be the main contractor for this stunning bridge. Well done to all involved! See [THIS link](#).

**EDIFICE
STRUCTURES**

Quality pedestrian bridges,
built tough in New Zealand.
